## EDUCATION

Degree/Certificate	Institute/Board	CGPA/Out of	Year
BSC in CSE	North South University, Bangladesh	2.64/4.00	August , 2024
H S C	Dhaka Imperial College/Dhaka	4.83/5.00	August , 2016
S S C	Motijheel Govt.Boys High School/Dhaka	5.00/5.00	May , 2014

## SKILLS

- Programming Languages:** Java, C , C++ , JavaScript ,Php ,Python , Sql , Html , Css
- Technologies:** Machine Learning, MariaDB, MongoDB,React, Scikit-learne, keras, Tensorflow
- Tools:** Excel, PowerBi, Tableau, Selenium, Pytorch, Github

## EXPERIENCE

- Enact Business Solutions [🌐]** Nov 2024 - Cureently Working  
Dhaka, Bangladesh  
*Contract Web Developer*  
  - Developed a proper functional E-commerce Website for Labelaj achieving Client Satisfaction.
  - Implemented Wordpress development, enhancing my webdeveloped Skilled.
  - Conducted Collecting on diabetes data from BSMMU for Analysis in machine learning and publish report.
- Parlance Consulting Services Ltd. [🌐]** August 2024 - Nov 2024  
Dhaka, Bangladesh  
*Data Analyst - Internship*  
  - Developed human sentiment analysis achieving Analysis huge sets of Data from Scial media.
  - Implemented Scrawling from social media like Facebook and X, enhancing Data Scraping Skilled and Do Analysis About real time data.
  - Conducted analysis on that Specific data, identifying What human thought about that perticuler posts or products.
- Thai Airways International [🌐]** Sep 2018 - Sep 2020  
Dhaka, Bangladesh  
*Officer(Supporting) of Remittance*  
  - Developed Yearly Financial Report For Bangladesh bank and City bank N/A, increasing Specific Software data entry and making report from that.
  - Conducted their Company remittance earning and tax to validate in Bangladesh.

## PROJECTS

- E-Commerce Website: This website built for selling product online for my client.** Nov 2024 - Dec 2024  
*Tools: Wordpress ,Cms Platform,Css ,Html ,Php* [🌐]  
  - Developed fully functional E-commerce website for Selling product online.
  - Implemented Payment gateway System for Received payment from customer.
  - Created Woocommerce , ensuring E-commerce Benifits.
- Portfolio : My personal portfolio showcasing my skills, projects, and experiences.** Oct 2024  
*Tools: Javascript , Reactjs , Typescript, Css , Html* [🔗]  
  - Developed with overflow feaures for Showcasing my Skills ,Project , and Expetiencies.
  - Implemented Typescript for Raw Output, achieving beautiful portfolio.
- Recipe-Site-Traffic Analysis: Identify those likely to drive high traffic on the recipe platform.** May 2023  
*Tools: Python, Jupyter Notebook , Statistics , Data Visualization, Data Preprocessing , Machine Learning method* [k]  
  - Integrated GradientBoostingClassifier Model and Logistic Regression Model to enhance model performance.
  - Evaluated Model leading to Business metrics
  - Research on traffic which is better for their platform.

- **Carbon Credit Stock Crypto Tracker:** for tracking and visualizing stock market data, crypto assets, with AI 2024  
*Tools: React, Node.js, Express, PostgreSQL, Python, Prophet, ARIMA, Machine Learning, WebSocket* [Q]
- Implemented AI forecasting models (Prophet and ARIMA) for stock and crypto price predictions.
- Integrated real-time data from Yahoo Finance, crypto APIs, and UNFCCC for carbon credit tracking.
- Developed full-stack dashboard with portfolio management and real-time WebSocket updates.
- Created comprehensive analytics platform with role-based access control and authentication.
- **Hospital Management System:**Demonstrating advanced software engineering and database concepts. 2024  
*Tools: Java, SQL, Database Design, Software Engineering* [Q]  
◦ Designed and implemented comprehensive database schema for hospital management operations.
- Developed application with advanced software engineering principles and best practices.
- Created system for managing patient records, appointments, and hospital administrative tasks.
- **Blockchain-based Token Project:** Implementation featuring token creation and smart contract functionality. 2024  
*Tools: Blockchain, Solidity, Web3, Smart Contracts, JavaScript, Ethereum* [Q]  
◦ Developed smart contracts for token creation and management using Solidity.
- Implemented decentralized application capabilities for digital asset management.
- Created blockchain-based token system with Web3 integration and local version support.
- **Ai Chatbot:** An Android mobile application with capabilities for intelligent interactions and AI functionality. 2024  
*Tools: Android, Kotlin, Java, LLM, Machine Learning, Python, API Integration* [Q]  
◦ Integrated Large Language Model capabilities into Android mobile application.
- Implemented AI-powered features and natural language processing on mobile devices.
- Developed intelligent chatbot with API integration for real-time AI interactions.

## CERTIFICATIONS

---

- [Data Camp](#) , Data Scientist certificate Nov 2024
- [Data Camp](#) , Data Analyst certificate Nov 2024
- [Data Camp](#) , Data Engineer certificate Nov 2024
- [Data Camp](#) , SQL Associate certificate Nov 2024
- [Data Camp](#) , Python Data Associate certificate Nov 2024
- [Google](#), Foundations of Data Science Nov 2024

## COURSE WORK

---

- **Course Work Inside University:** CSE 115 - C , CSE 215 - Java , CSE 225 - C++ , CSE 311 - SQL , CSE 331 - Hardware L-1 ,CSE 332 - Hardware L-2 ,Cse 482 - Web Technology, CSE 445 - Machine Learning ,CSE 465 - Deep Learning
- **Course work from Online Institutions:** Udemy - Webscraping with python ,Microsoft - Github Foundation Course, MongoDB learner -Associate Developer Node.js, Data camp - Data litarecy and Ai Fundamentals ,
